Overview of the Transition and Families Modules

The Center on Secondary Education for Students with Autism Spectrum Disorders’ (CSESA) Transition and Families (T & F) component is a critical component of the full CSESA model. Student-centered planning for a youth’s future beyond high school that is built on input from the student, family, and various professionals familiar with the student is important to a young person with Autism Spectrum Disorder’s (ASD) success in college (postsecondary learning), careers, and other adult living beyond high school. The T & F component includes five modules divided into the major topical areas (1) Community and School Mapping, (2) Transition Planning, (3) Student Involvement in the Individualized Education Program (IEP) planning and meeting, and (4) Work Based Learning Experiences (WBLE). The fifth module, Transitioning Together for families and leaders of family groups, is another critical segment of the CSESA program and is located in a separate document. Within each module there is an overview of the expectations and process, followed by appendices of lesson plans, forms, and other instructional resources. At the end of each module there is a section including guidance for recording students’ progress through use of a Student Portfolio System. Additionally, there is a glossary of terms that may be used as a resource which is located in a separate document. The process for the CSESA Model on page 7 provides a context for how the various pieces of this T & F component fit within CSESA as a whole. The modules were developed as a blueprint for the teacher, case manager, or other school level professional implementing the curriculum. However, its forms and tips may be useful for any of the stakeholders engaged with youth with ASD.

Each of the modules includes: (a) an overview; (b) list of tasks to complete (page 8); (c) templates and forms for various activities, such as Community Mapping or Setting Up a School-Based Enterprise; and (d) guidance on permanent products to include in the Student Portfolio. The modules are provided electronically to allow teachers and other users to explore websites which may provide additional resources; however, the intent is not to send users of this curriculum searching for more information; but to provide the resources a teacher or team will
need to complete the curriculum. The additional links and resources are for teachers or schools who want to expand their transition program.

The Student Portfolio section in each module provides a list of products, by topical area, that may be selected to reflect a student’s progress. There should be enough products included to get a sense of students’ strengths, interests, and accomplishments; but not so many that it becomes cumbersome. While students may need assistance in selecting “the best” or “most representative” samples from their work in this curriculum, student input and preference in selection should be valued. There are four possible methods for compiling the portfolio (a) an online portfolio system, (b) a school or district based “shared” drive, (c) a USB drive, or (d) a paper binder version. A task analysis is provided for each of the choices, which would be selected based on school and student factors. Other permanent products from the academic and behavioral interventions in CSESA might also be documented in the Student Portfolio. The Portfolio may serve to not only track student progress in the CSESA Program, but as valuable transition planning information and contribute to the student’s Summary of Performance documentation upon exit from high school.

As noted, the Transitioning Together module is overviewed in a separate document along with the glossary. The guidance, scripts, forms, and tips for the family are contained in the fifth module. It is important, however, for professionals who are working with students through the T & F component of CSESA to be aware of the overall content, schedule, and structure of the Transitioning Together series. Transitioning Together is a critical module of the T & F component, as family empowerment and engagement in transition planning are critical to successful outcomes for youth.

How does this all fit together? The T & F component overlaps in time throughout implementation and informs the completion of each of the other components. For example, the Transition Services or Annual Goals in the IEP may relate to the completion of specific WBLE components, which may then inform future transition planning, based on a student’s likes, dislikes, and accomplishments in that experience. Similarly, information gathered during the Transitioning Together classes may inform aspects of the Transition Planning process, as well.
A checklist for completing the transition component of the CSESA curriculum is included on page 8 of this module. The Glossary may be useful as multiple stakeholders engage with this program.

**Embedding Activities for Transition Skills in Standards-Based Instruction**

Post-school outcomes are the most important aspect of successful transitioning from high school to college and career fields. Because of poor post-school outcomes for students with ASD, there is a necessary requirement to engage students in activities that will expose them to college and career activities, (i.e. Career Explorations, Job Shadowing, Work Sampling, Service Learning, Internships, Paid Employment, Apprenticeship, and/or Mentoring) and to provide opportunities for lessons in IEP participation and career research. Experiences should be selected that will support a student’s postsecondary goals regarding college and careers. For some students, they will participate in experiences that are more focused on employment, while others will participate in experiences directly related to college preparation. Participation in the activities should inform the transition assessment process and increase students’ skills, in preparation for their postsecondary goals.

For students who have a postsecondary goal of attending a two- or four-year college, identifying time in the school day to complete a transition-related curriculum and/or work-based learning experiences in high school (e.g. developing career awareness skills, participating in work experiences) and possibly completing a transition curriculum, such as “Self-Directed IEP,” may lead to greater success in postsecondary education (Test, Mazzotti, et al., 2009). IEP teams composed of family members, school counselors, career technical educators, and, of course, the student may need to be creative in identifying ways to develop these important skills.

Some high schools use “advisory” time or homeroom/home base as a period of time available each day, or at least one time each week, for all students to engage in some of the activities noted above. Participating in after-school clubs, establishing relationships with community
mentors in the school, helping families complete certain activities with their child outside of school hours (possibly through the support of other families, agencies, or the school counselor) are other methods to gain additional knowledge about a variety of careers. Some schools may have classes such learning labs or study halls where short lessons on IEP participation or self-advocacy could occur. “Working lunch” meetings with the school counselor may be another option in which time can be dedicated to transition lessons.

Several of the activities in career exploration might easily be incorporated to a student’s existing schedule. Students may engage in writing, research, and presentations within the English Language Arts standards or as a research project in a computer lab class. Finally, exploring and even experiencing careers associated with significant events in history (e.g. inventors, doctors, religious leaders, politicians, teachers) or within the S.T.E.M. fields might serve as project-based learning in social studies, science, or mathematics courses.

Introduction to Community and School Resource Mapping: Module 1

The Community and School Mapping sections, Module 1 of Transition and Families, include a task analysis (or checklist) for how to include multiple stakeholders in identifying the resources in a community and school that may be useful for high school students with ASD and their families. The section references forms included in the Appendix can be used to complete the process. Completed Community and School Maps then provide information that can be used in the Transitioning Together and Transition Planning modules.

CSESA Process
This module (Module 1—Community and School Resource Mapping) is part of the assessment process which allows school personnel and students to determine what resources are available upon graduation and within the school.

The interventions for the CSESA model for each student are determined through individualized transition planning. Implementation of each component is supported through coaching of staff to implement interventions and transition planning and intervention are supported through a strong family education component. Student achievements and reflections on their progress can be documented through the Student Portfolio, which is intended to assist students as they transition into life beyond high school.

Community Resource Mapping

Introduction

Community resource mapping is a process used to identify resources that will help students become successful while transitioning through and from high school. Community resource mapping should be an ongoing process, and may be completed by a designated administrator, teacher, or parent with the help of a group of individuals committed to student success. Even students can help complete the community resource mapping activity. This fun-to-create, collaborative, and useful tool has the ability to support the entire community. Overall, community resource mapping supports transition planning and work-based learning experiences by locating nearby supports and opportunities to assist with student exposure to various employment and education opportunities, as well as agencies and services. The Figure below lists some of the areas that a community resource map might include.
Possible Community Resource Mapping Team Members

Participants on the team for completing the community resource map should have knowledge or access to information which indicates current resources specific to an area and which could be utilized by individuals with disabilities. The following are possible participants to consider:

- Members of community advocacy groups: The Arc, Autism Society, Autism Speaks, First In Families, Exceptional Children Advocacy Center, Autism Foundation of the Carolinas, Latin American Coalition, etc.
- Members of the school system central office: Program Specialists, Lead Teachers, Coordinators, school administrators, school counselors, career tech teachers, etc.
- Parents
- Students with community resource knowledge
- Chambers of Commerce or Business League Association members
- Individual with knowledge of health services
- University or community college personnel
- Parks and Recreation Staff
- Vocational Rehab Personnel
- Individuals with knowledge of case management and county services

Once you have established your initial team (you may want to add additional members as you complete the mapping process) take your time in thinking, as a small or large group, about completing your community resource map. See Appendix B-1 for a copy of the task-analysis for completing your community resource map, Appendix B-2 for a blank community resource mapping form, and Appendix B-3 for an example of a completed community resource map.

Possible Community Resource Mapping Uses

The uses for the Community Resource Mapping tool are endless. It provides a network of resources to assist schools, families, and community agencies to collaborate and work together. Some of the following are possible uses for Community Resource Mapping:

- Provides support and additional information for the transition process
- Provides support in locating new or additional work-based learning sites
- Provides opportunities for increased collaboration and networking with families and agencies
- Reduces the stress of families and schools in locating services
- Saves time for schools, families, and agencies
• Assists in determining community areas of need
• Provides a visual and structured tool to assist students and families in planning
• Supports a range of individuals and groups

Community Resource Mapping Evaluation Form

Please evaluate the community mapping process, the form, and the task analysis used to complete the process with the following one to five rating scale with one being “strongly agree” and five being “strongly disagree.”

1. The task analysis was easy to follow.
   Strongly agree  agree  neutral  disagree  strongly disagree

2. Community mapping is beneficial to families and students.
   Strongly agree  agree  neutral  disagree  strongly disagree

3. The Community mapping form was easy to navigate and complete.
   Strongly agree  agree  neutral  disagree  strongly disagree

4. The end product is beneficial to share with families, students and staff.
   Strongly agree  agree  neutral  disagree  strongly disagree

5. Community mapping is important to the transition process.
   Strongly agree  agree  neutral  disagree  strongly disagree

The strengths of the process are:
____________________________________________________________________________
____________________________________________________________________________

The weaknesses of the process are:
____________________________________________________________________________

Appendix A-6

Community Resource Map - SAMPLE

Information and Assistance:
Wiscoun Resource Center is home to one of the five Regional Centers for Children and Youth with Special Health Care Needs (CYHCC), part of a state and federal program that assists families and professionals to locate and keep in touch with the special health care and regular health care services they need. We offer free assistance to parents of CYHCCs and the professionals who work with them.

Planning for Adulthood: We provide guidance and support to help parents plan for the future, including education and training, career and work, living arrangements, health and insurance, legal issues, housing, and community involvement.

At-Home Support: Services are available to help support a child with a disability in their home and community setting. Services include, but are not limited to, homemaker services, household chores, personal care, and supervision.

Parent to Parent Support: We support parents and caregivers of children with special needs. We offer peer-to-peer support, information sharing, and emotional support.

When You Don’t Know Who to Call, Call Us:
1-800-552-3321
Southeast Regional Center for Children and Youth with Special Health Care Needs, at the School of Medicine and Public Health, University of Wisconsin–Madison, 4220 Monona Drive, Madison, WI 53706.

Special Education:
All public schools are required to provide special education and related services to students who are eligible. The Wisconsin Parent Link (WPL) can be obtained at wplonline.org. We encourage parents to work closely with their child’s school to ensure that they are receiving the services they need.

Recreation:
Children and adolescents in stable families benefit from quality recreation activities. A variety of opportunities provide educational and therapeutic experiences.

Training and Advocacy:
Individuals who receive services under the Public Authority and those who are eligible for the public authority are encouraged to participate in training and advocacy activities. This helps ensure that their voices are heard on the issues that matter to them.

Health Care Coverage:
Some employers offer programs that provide health care coverage to families with children with special needs. Each program has different eligibility criteria and may require a contribution from the family.

Mental Health and Crisis:
When crisis occurs, it can be helpful to have a support system in place. Resources include family support groups, mental health professionals, and community organizations.

Infants and Young Children:
Early intervention services are available to support the development of children with special needs. Services may include occupational therapy, physical therapy, and speech therapy.

Child Care:
Home-based and center-based care are available in Wisconsin. Information about available services and requirements can be obtained through the Child Care Resource and Referral System.

Respite:
Respite services are available to support families who have children with special needs. Services may include family support, sibling support, and other community resources.

Department of Health and Human Services:
Children and adults with special needs are supported by a variety of programs and services. The Wisconsin Parent Link (WPL) can be obtained at wplonline.org. We encourage parents to work closely with their child’s school to ensure that they are receiving the services they need.

School Resource Mapping

Introduction

School resource mapping is another great tool to use to identify resources right where you are. School resource mapping is intended to facilitate the activities within the Transitioning Together activities and P.R.I.S.M. components, too. Ideally, this tool should be used to organize information collected to have resources all in one easy-to-find place to answer questions and utilize resources within your specific school. The Figure below displays some of the school resources that could be mapped.
Possible School Resource Mapping Team Members

Participants on the team for completing the school resource map should have knowledge or access to information, which indicates current resources specific to the school being mapped. This will require participants with familiarity with multiple areas of the school. The following are possible participants to consider:

- School Administrators
- School Department Chair Persons; particularly the chair for the Special Education Department
- School Counselors
- Career Tech Personnel
- Students
- Therapists
- Technology Support Personnel
- “A Team” Coordinators
- Lead Teachers
- Parents with leadership roles or school knowledge, such as PTO officer, etc.
- School volunteers
- Paraprofessionals

Once you have established your initial team (you may want to add additional members as you complete the mapping process). Take your time in thinking, as a small or large group about completing your school resources map. See Appendix C-1 for a copy of the task analysis for completing your school map, Appendix B-2 for a blank school mapping form, and Appendix C-3 for a completed school map.

Possible uses of School Resource Mapping

School resource mapping is a visual tool which can benefit any student within a high school. Some of the possible uses for school mapping are:

- Assist a student new to the school and the area
- Assist a student who is transitioning into the school from another school or a middle school
- Assist a student who has difficulty transitioning or returning to school after breaks or vacations
• Assist a student who has difficulty with change, such as change in school personnel or location of school services
• Provides a simple and organized information tool for students/ families with limited internet access
• Provides a tool for a student who has difficulty retaining school information
• Provides additional visual structure to locate school resources, especially helpful for large schools
• Assists in making large high schools more manageable
• Assists in identifying school resources for high schools with limited website information

School Resource Mapping Form (2012-2013) - SAMPLE

Directions: In and around each hexagon, write the corresponding information to help your school community identify important information about each topic. These forms should provide additional information to identify resources to be used to assist in the transition planning process.

School's Mission, Vision, Goal:
Our Mission: Vance is committed to academic excellence for all students in a cohesive, inclusive, multicultural, student-centered climate through the use of an interdisciplinary approach, the integration of technology, and family and community involvement within a safe and orderly environment.

School Name and Address:
Zebalon Vance High School;
7600 IBM Drive,
Charlotte, NC 28262

School's Telephone: 980-343-5284; fax: 980-343-5286

School Website:
http://schoolscms.k12.nc.us/VanceHighSchool

Principal's name: Melissa Dunlap

School secretary's name: Margell Rucker, Bobbi Ritchie, Bernadette Blackmon, Rhyselle Stitt

Main Office

School hours: 7:15 AM - 2:15 PM M-F; in Central Secondary Zone; School Uniforms are NOT required, but there is a dress code policy. (No see-through clothing or visible underwear. Hats should not be worn in the building. A specific test for length of garments- “fingertips test” is conducted, as needed.)
What are supplemental aids provided?
Social Workers: Gretchen Anthony and Patrice Bush,
Tutoring, AVID, Job Coach (OCS)

What are supplemental services?
EC Services per IEP, 504 plans, speech, OT and PT as indicated on IEP, counseling and student services
Counselors: Keith Smith (A-C), Anita Durr-Lowe (D-L & 504), Lorraine Stewart-Ayers (J-M), Byron Gettings (T-Z)

What are supplemental supports?
School Counselor Name/ Room #:

What clubs are available to join?

What sports are available to join?
Sports: baseball, basketball (JV, Varsity, Boys or Girls), cheerleading, cross country, diving, golf, football, soccer, softball, swimming, tennis, track, volleyball, wrestling
Tutoring, JROTC, Enpowering Youth-Changing Communities,

What other honor societies are offered?
Spanish Honor Society, National Honor Society, Tri-M Music Honor Society, French National Honor Society, National Technical Honor Society,

What other extracurriculars are available?
Class advisors’ names:

• The date of senior prom, junior prom, etc., is: ____________________________
• School-wide prom is May 11, 2013 @ Nascar Museum and cost is $70.00 per couple. Prom for students with disabilities is May 3, 2013.
• Homecoming will be during this week: (During football season-has passed)
• The date of graduation is: Sat. June 8, 2013 @ 7:30 PM
• Information about class trips:

Community Service

• School’s next clothing drive: Jeans for Teens

• School’s next food drive is going to be on ________________________________

• What are additional community service projects: Friends Club

Post-School

• What are options for diplomas offered at school: Standard diploma for completion of OCS credits and community-based, or competitive employment are completed.

• Date/ time of college fairs: Transition Fair March 14, 2013.

Health Suite

School Nurse’s Name and Phone Number: Robin Lawerance 980-343-5284

• Where are the school’s alcohol and drug prevention services?

• What are the other health services offered in school? Referral for Behavioral Health Services

Technology

What is the name of the school’s technology aide? Jeremy White

• Where does one go for assistive technology? Through spech therapist evaluation or classroom teachers;
• Additional technology or sites used by school? "S Drive"; Discovery Education

• Where does one go to for access to the internet or computers to type my work? Computer Labs (F Hall), Media Center

Hallways

What is the name of the school’s hall monitor?

• Where is the most helpful information about the school/ class?
• VHS administrators & security monitor hallways with walkie-talkies.
