

Independence and Behavior *Promoting Responsibility, Independence, and Self- Management- PRISM*

Center on Secondary Education for Students with
Autism Spectrum Disorder

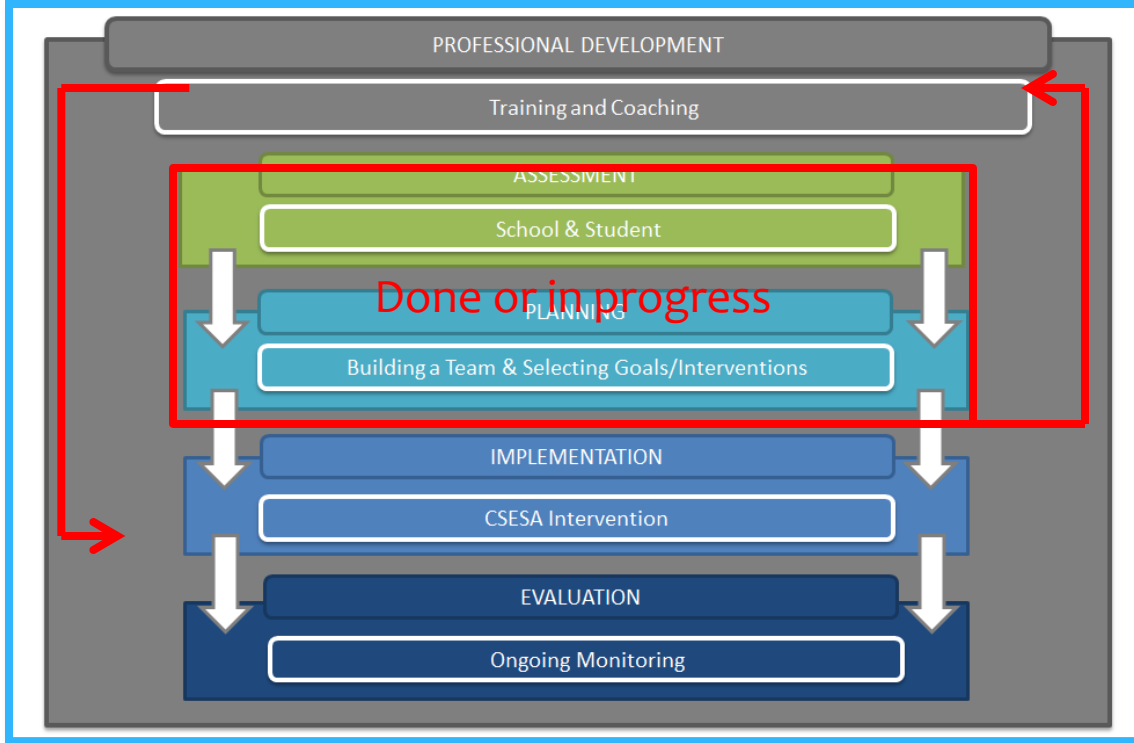

Thank you!

- * Thank you for your time and support of the CSESA project!
- * Overview of PRISM and procedures
 - * Why is it important to target independence?
- * PRISM implementation at your school

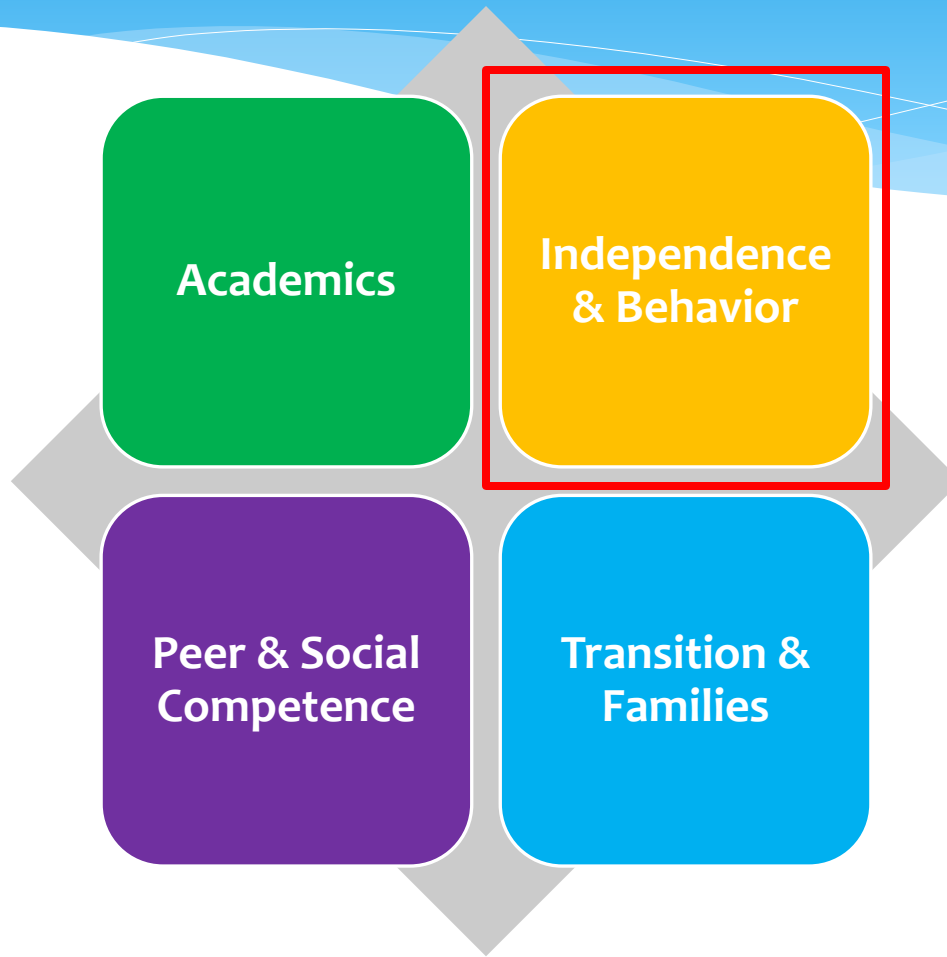

Reminder of the CSESA Process

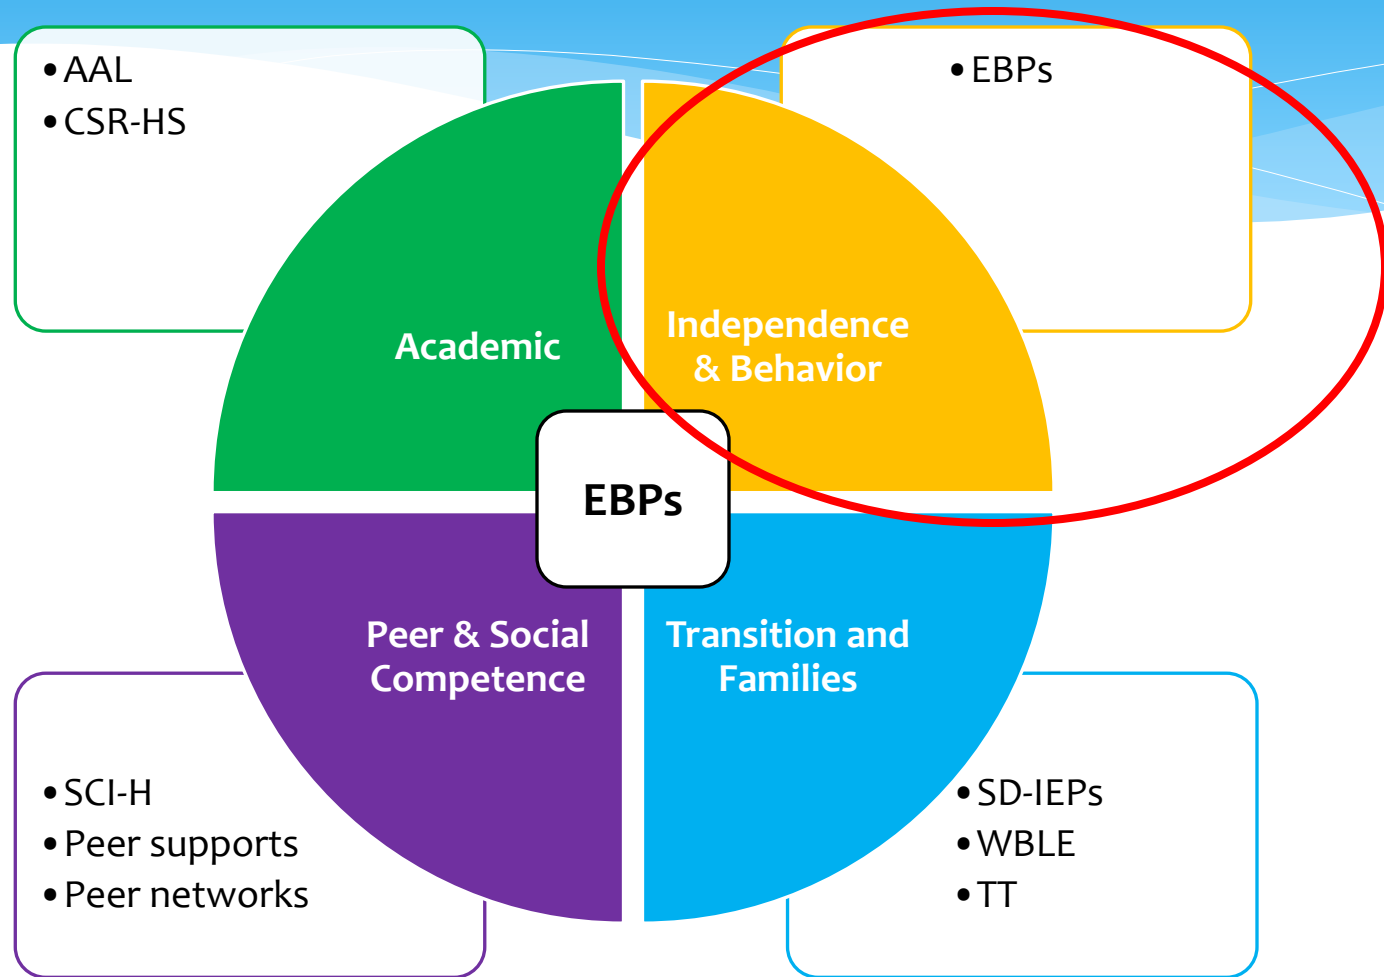

- * We've already assessed and started planning
- * Now, some training related to implementing interventions to support independence

Reminder of CSESA Domains

CSESA Interventions

Why the emphasis on independence?

- * Independence and autonomy in adolescence

Why the emphasis on independence?

- * Thinking about behavior broadly... this is what is concerning :
- * When young adults with ASD leave the public school system,

“nearly 80% still live at home, almost half have no jobs or postsecondary training, 40% never have contact with friends, 17% never feel hopeful about the future, 21% never engage in outside activities, and many experience a decrease in insurance coverage and therapy services” (Shattuck, 2010).

Why the emphasis on independence?

Identified Prevalence of Autism Spectrum Disorder

ADDM Network 2000-2010
Combining Data from All Sites

Surveillance Year	Birth Year	Number of ADDM Sites Reporting	Prevalence per 1,000 Children (Range)	This is about 1 in X children...
2000	1992	6	6.7 (4.5 - 9.9)	1 in 150
2002	1994	14	6.6 (3.3 - 10.6)	1 in 150
2004	1996	8	8.0 (4.6 - 9.9)	1 in 125
2006	1998	11	9.0 (4.2 - 12.1)	1 in 110
2008	2000	14	11.3 (4.8 - 21.2)	1 in 88
2010	2002	11	14.7 (14.3 - 15.1)	1 in 68

- * 8 year-olds in 2002 are now 20
- * We will see a 78% increase in demand for adult services in the next 6 years

Why the emphasis on independence?

Postsecondary Education and Employment (19-23 Year Olds)

(NLTS2 Study; Shattuck et al., 2012)

Full-Time Employment (21-25 Year Olds)

(NLTS2 Study; Roux et al., 2013)

Share your experiences

- * What are your former students with ASD doing now after completing high school?
 - * Where are they?
 - * What do they do during the day?
 - * Who are they connecting with?
 - * How would you describe their quality of life?

Why the emphasis on independence?

- * For these reasons, in the CSESA model, **the absence of independent behavior is viewed as much of a behavior problem and interference with success in high school and beyond as are the maladaptive behaviors.**
- * We purposefully **promote *Responsibility, Independence, and Self-Management***- the behavioral outcomes we are all striving for when working with adolescents on the autism spectrum (PRISM)

Why is independence challenging?

Why is independence challenging?

- * Characteristics of
 - * Organization
 - * Judgment
 - * Sequencing
 - * Initiating
 - * Prompt Dependence
 - * Social Demands
 - * Managing Emotions

Share your experiences

- * How do some of your students with ASD struggle with these areas related to independence at your school?
 - * Organization
 - * Judgment
 - * Sequencing
 - * Initiating
 - * Prompt Dependence
 - * Social Demands
 - * Managing Emotions

Why is independence challenging?

- * Consider teaching strategies used in the past and currently
- * Does current service delivery model encourage independence?

What students are appropriate to receive intervention related to independence?

Students in general education

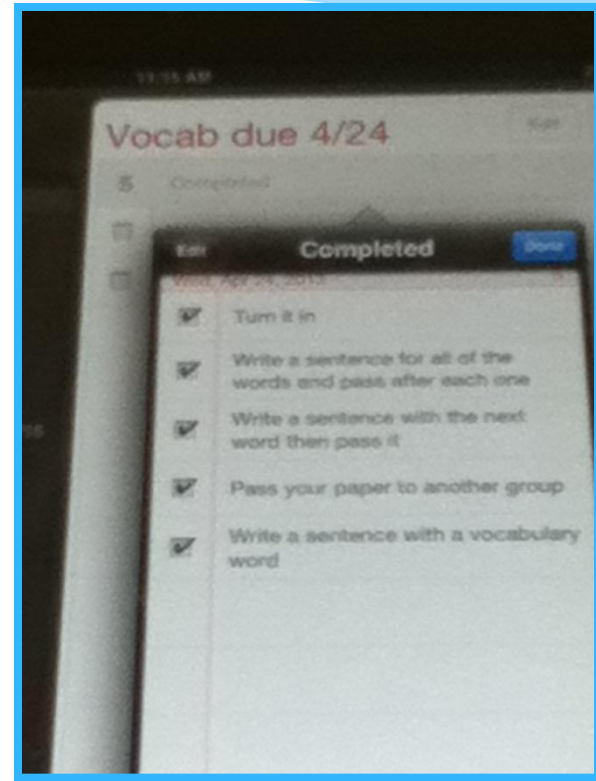

Students in varied programs

Students in special education

Who will benefit from intervention related to independence?

“It was exciting to see how quickly Mike learned the steps to the task analysis and how quickly he began implementing his new strategies”

Can we really impact/teach these skills?

“My student was bringing all 6 of his binders to my class, and assignments were getting lost. It was also disruptive to have him spreading out all his stuff. His new organized binder, with just a folder for each class, has helped him be much more organized”.

Can we really impact/teach these skills?

“My student is now able to brush his teeth with very few prompts.”

Can we really impact/teach these skills?

“My student is coming to find me to ask for help.”

How do we teach/support independence?

- * Use Evidence-Based Practices
 - * 27 identified by the National Professional Development Center
 - * Don't need to learn them all 😊

Current Review: NPDC

27 Evidence-Based Practices			
Antecedent –Based Interventions	Functional Communication Training	Prompting	Structured Play Groups
Cognitive Behavior Intervention	Modeling	Reinforcement	Task Analysis
Differential Reinforcement	Naturalistic Interventions	Response Interruption/Redirection	Technology-Aided Instruction/Intervention
Discrete Trial Teaching	Parent-Implemented Interventions	Scripting	Time Delay
Exercise	PECS	Self-Management	Video Modeling
Extinction	Peer-Mediated Instruction/Intervention	Social Narrative	Visual Supports
Functional Behavioral Assessment	Pivotal Response Training	Social Skills Training

- * What practices sound familiar to you?

List of EBPs

EVIDENCE BASED PRACTICES FOR ADOLESCENTS

Evidence-Based Practice	Definition of the Evidence-Based Practice
1. Antecedent-Based Interventions	<i>Involves the identification of factors that are reinforcing an interfering behavior and modification of the environment or activity so that the factor no longer elicits an interfering behavior (Other terms: changing environment to prevent behavior from happening).</i>
2. Cognitive behavioral intervention	<i>Instruction on management or control of cognitive processes that lead to changes in overt behavior (Other terms: cognitive behavior therapy).</i>
3. Differential reinforcement of other/alternative behavior	<i>Reinforcement is provided for desired behaviors, while inappropriate behaviors are ignored.</i>
4. Discrete trial training (DTT)	<i>A one-on-one instructional approach used to teach skills in a planned, controlled, and systematic manner. Each trial or teaching opportunity has a definite beginning and end and the use of antecedents and consequences is carefully planned and implemented.</i>
5. Exercise	<i>Increase in physical exertion as a means of reducing problem behaviors or increasing appropriate behavior.</i>
6. Extinction	<i>Involves the withdrawing or terminating the positive reinforcer that maintains an inappropriate interfering behavior (Other term: ignoring).</i>
7. Functional behavior assessment (FBA)	<i>A systematic set of strategies that is used to determine the underlying function or purpose of a behavior, so that an effective intervention plan can be developed. An FBA consists of describing the interfering or problem behavior, identifying antecedent or consequent events that control the behavior, developing a hypothesis of the behavior, and testing the hypothesis.</i>
8. Functional communication training (FCT)	<i>A systematic practice to replace inappropriate behavior or subtle communicative acts with more appropriate and effective communicative behaviors or skills.</i>
9. Modeling	<i>Demonstration of a desired target behavior that results in imitation of the behavior by the learner and that leads to the acquisition of the imitated behavior (Other terms: role play, imitation).</i>

Modeling Fact Sheet

Brief Description

Modeling (MD) involves the demonstration of a desired target behavior that results in imitation of the behavior by the learner and that leads to the acquisition of the imitated behavior. MD is often combined with other strategies such as prompting and reinforcement.

Qualifying Evidence

MD meets evidence-based criteria with 1 group design and 4 single case design studies.

Ages

According to the evidence-based studies, this intervention has been effective for toddlers (0-2 years) to young adults (19-22 years) with ASD.

Outcomes

MD can be used effectively to address social, communication, joint attention, play, school-readiness, academic, and vocational skills.

MODELING FACT SHEET—SUGGESTED CITATION

Cox, A. W. (2013). *Modeling fact sheet*. Chapel Hill: The University of North Carolina, Frank Porter Graham Child Development Institute, The National Professional Development Center on Autism Spectrum Disorders.

How do we decide which EBP to use?

- * Ask: What is our goal/objective targeting?
 - * Consider the specific goals and related objectives
- * Ask: What are our options?
 - * Look at the domain of behavior to which the specific goal relates

How do we decide which EBP to use?

 Domain: Independence Behavior	
CSESA Core Components <input type="checkbox"/> Orientation to school (for student) <input type="checkbox"/> Orientation to student (for staff)	
Subdomain: Organization	
SKILLS/BEHAVIORS	EVIDENCE BASED PRACTICES
<ul style="list-style-type: none"><input type="checkbox"/> Accesses and follows daily schedule<input type="checkbox"/> Uses tools to keep track of assignments/work tasks and/or scheduling<input type="checkbox"/> Brings appropriate materials to assigned location<input type="checkbox"/> Materials/work space are organized<input type="checkbox"/> Identifies steps required to complete assigned activities; completes assigned activities<input type="checkbox"/> Moves to next destination or next activity on time<input type="checkbox"/> Requests/initiates meetings with work groups, staff as appropriate<input type="checkbox"/> Other:	<div>Foundational EBP</div> <ul style="list-style-type: none"><input type="checkbox"/> <u>Differential reinforcement</u><input type="checkbox"/> <u>Prompting</u><input type="checkbox"/> <u>Reinforcement</u><input type="checkbox"/> <u>Task analysis</u><input type="checkbox"/> <u>Time delay</u><input type="checkbox"/> <u>Parent implemented interventions</u><input type="checkbox"/> <u>Self-management</u><input type="checkbox"/> <u>Social narratives</u><input type="checkbox"/> <u>Technology aided instruction and intervention</u><input type="checkbox"/> <u>Video modeling/Modeling</u><input type="checkbox"/> <u>Visual supports</u>

Next, make a decision based on...

- * The skills being taught
- * Your program strengths/needs
- * The learner's interests and motivators
- * Supports already in place
- * History of what has and has not worked

Unless you're using
evidence-based
procedures, I can't hear a
word you're saying.

your  cards

Let's practice that part- Linking GAS goal to intervention selection

- * Levi is a 9th grader, served primarily in a self-contained setting
- * He will go to great lengths to successfully complete tasks himself.
- * Levi avoids interactions. Rather than actively getting help, Levi will sit quietly at his desk and whisper “I need help”.

Linking GAS goal to intervention selection

- * SSSC Data for Levi:
 - * PS2. **Seeks help from adults when appropriate**
- * Rated as “Not like student” and “major concern” across 3 staff members

Linking GAS goal to intervention selection

Baseline_AskingforHelp.mp4

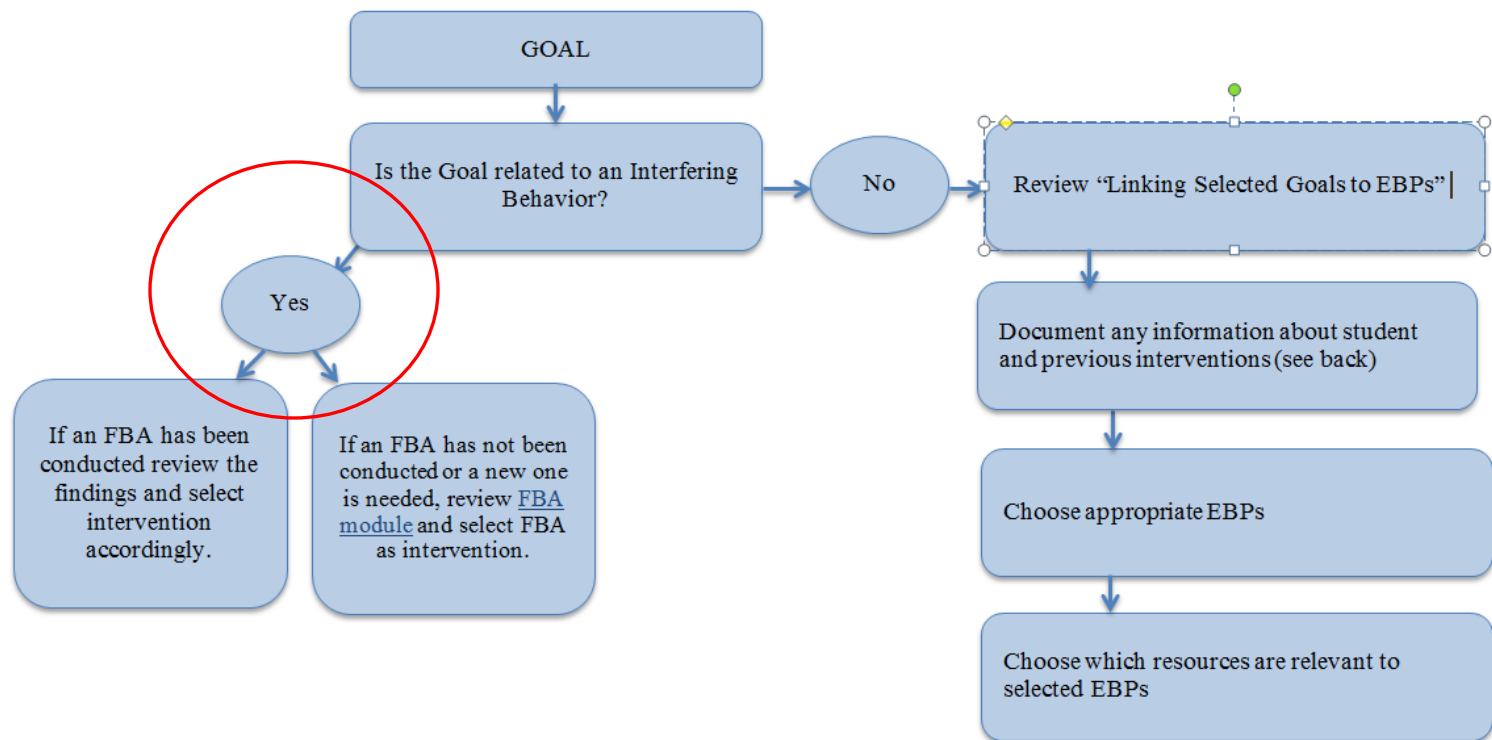

GAS Goal

Current level of performance	During a week of school, staff counted Levi asking for help by saying “I need help” an average of 3 times a day. He got out of his seat once during that week with prompting.
Initial Benchmark	
Secondary Benchmark	
Annual Goal	
Exceeds Annual Goal	

Linking GAS goal to intervention selection

Independence and Behavior Planning Flow Chart

Decide on the most appropriate intervention or strategy to address the selected goal using the following flowchart.

If goal is related to an interfering behavior

- * Resources to support staff in conducting an FBA
- * Training
- * EBP Brief

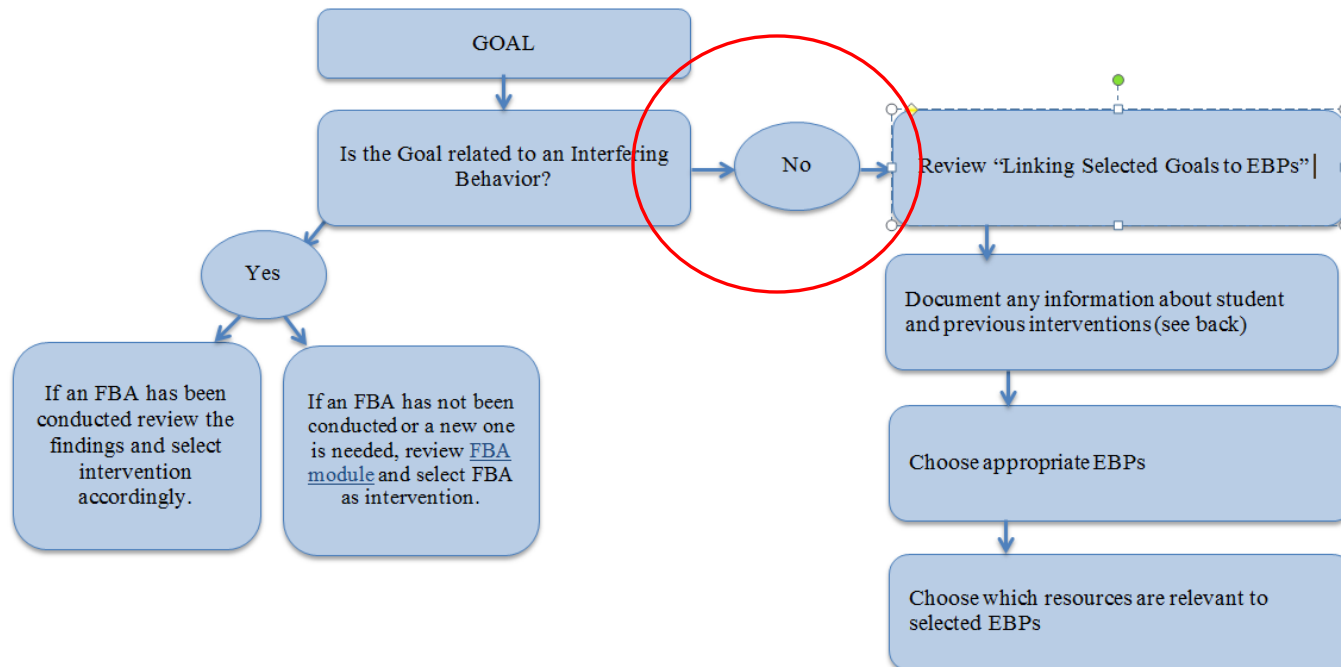

Steps of the Basic FBA

1. Identify a behavior of concern
 - Define in a way that is observable
 2. Identify predictors in the environment
 - Things that happen before and after
 3. Identify the function
 - Why does that happen?
-
4. Teach a replacement behavior
 - What is appropriate way to get same function?
 5. Change the environment to prevent behavior
 - What could make the problem not happen?
 - What consequences are functional?

Linking GAS goal to intervention selection

Independence and Behavior Planning Flow Chart

Decide on the most appropriate intervention or strategy to address the selected goal using the following flowchart.

- **Supports** already in place
- **History** of what has and has not worked

Linking GAS goal to intervention selection

Optional Considerations to Assist in EBP Selection

Prior to intervention selection, it is important to consider how the student's strengths, preferences and characteristics should influence intervention selection and implementation. *Note: if not sure or need additional information check with the student if applicable.*

Communication Skills: *How does this student routinely communicate with others?*

Difficulty initiating, limited verbal skills

Preferences: *What are the student's likes and dislikes? Who does the student enjoy interacting with (e.g. peers, staff, other)?*

Painting, soda (don't disturb food routines), cooking, gym

Other Personality Traits or Characteristics: *What other things are important to note? What does the student do well?*

Painting, soda (don't disturb food routines), cooking, gym

Program Strengths/Supports Already in Place:

Autism specialist has training on picture exchange communication (PECS)

Consider interventions or strategies that have been tried in the past to address the selected goal: What was the intervention? What worked? What didn't work?

Some PECS; Will sometimes use a device but will push button over & over when staff is not nearby

Linking GAS goal to intervention selection

What if I don't know what the EBPs are so I can't select one?

- * Your CSESA partner will help!
 - * Offer mini-trainings on EBPs
 - * Showing you examples of materials related to different EBPs
 - * Sharing personal experiences
 - * Asking questions to help the decision making process

Full GAS Goal

Current level of performance	During a week of school, staff counted Levi asking for help by saying “I need help” an average of 2 times a day. He got out of his seat once during that week with prompting.
Initial Benchmark	Using a visual picture with “I need help” printed and prompt from staff, Levi will ask for help when needed once a day by getting out of his seat, finding someone (any teacher, assistant, peer), and giving them the “I need help” card for 3 out of 4 consecutive days.
Secondary Benchmark	Using a visual picture with “I need help” printed, Levi will independently ask for help when needed once a day by getting out of his seat, finding someone (any teacher, assistant, peer), and giving them the “I need help” card for 3 out of 4 consecutive days.
Annual Goal	Using a visual picture with “I need help” printed, Levi will independently ask for help when needed 3 times a day by getting out of his seat, finding someone (any teacher, assistant, peer), and giving them the “I need help” card for 3 out of 4 consecutive days.
Exceeds Annual Goal	Using a visual picture with “I need help” printed, Levi will independently ask for help when needed 5 times a day by getting out of his seat, finding someone (any teacher, assistant, peer), and giving them the “I need help” card for 3 out of 4 consecutive days.

Planning & Implementing Intervention

PHASE 2-f: Plan Implementation

The Core Team and any additional Team Members who will be a part of implementation decide on the *who, when, and how* of intervention implementation.

PRIORITY Goal 1:					
Interventions	How to implement	Who will implement	When/Where	How will data be gathered? By whom? <input type="checkbox"/> Fidelity <input type="checkbox"/> Student progress	Other
Resources Needed (technology, visuals, etc.):					
Professional Development Needed:	What form (coaching, training, modules, etc.):		For Whom:

Evidence Based Practice Briefs

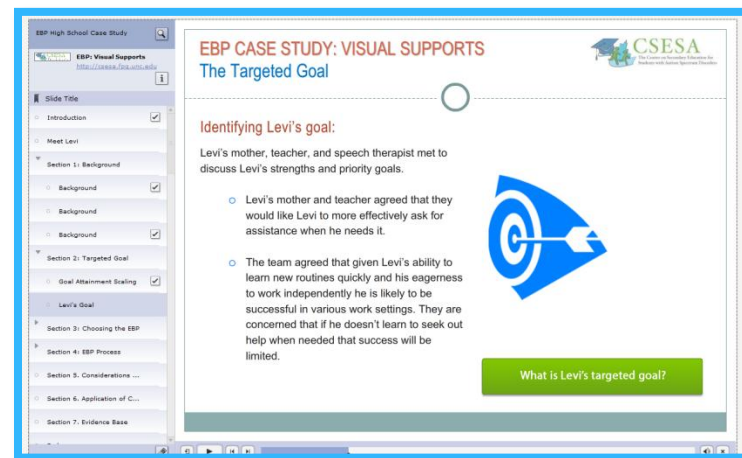

<http://csesa.fpg.unc.edu/resources>

EBP Case Studies

<http://csesa.fpg.unc.edu/resources>

The screenshot shows the CSESA Resources page. The header includes the CSESA logo and a search bar. The main content area is titled "Self-Management" and includes a "Self-Management Brief" section. This section describes an evidence-based practice (EBP) brief as a file that contains all of the core components of a practice, or EBP. It lists the components of an EBP brief: Overview, Steps for Implementation, Implementation Checklist, Evidence Base Summary, and Frequency Recording Sheet. The "Evidence-Based Practice Brief: Self-Management" section is highlighted, and it lists the components of the brief: Overview, Steps for Implementation, Implementation Checklist, Evidence Base Summary, and Frequency Recording Sheet. The "Evidence Base Summary" section is also highlighted, and it lists the components of the summary: Overview, Steps for Implementation, Implementation Checklist, Evidence Base Summary, and Frequency Recording Sheet.

The screenshot shows the EBP Case Study: Visual Supports page. The header includes the CSESA logo and a search bar. The main content area is titled "EBP CASE STUDY: VISUAL SUPPORTS" and includes a "The Targeted Goal" section. This section describes the goal of the case study, which is to help Levi, a student with autism, learn to ask for assistance when he needs it. It lists the steps for implementation: 1. Identify the goal, 2. Break the goal into smaller steps, 3. Teach the steps, 4. Practice the steps, and 5. Reinforce the steps. The "Identifying Levi's goal:" section is highlighted, and it lists the goal: Levi's mother and teacher agreed that they would like Levi to more effectively ask for assistance when he needs it. The "What is Levi's targeted goal?" section is also highlighted, and it lists the goal: Levi's mother and teacher agreed that they would like Levi to more effectively ask for assistance when he needs it.

Planning & Implementing Interventions

Learning Objectives for Visual Supports

As a result of this presentation, practitioners will:

1. describe the evidence that supports the use of visual supports.
2. identify skills that can be promoted through the use of visual supports.
3. explain the different types of visual supports and when they might be used.
4. understand how to implement the steps of visual supports as intended.
5. discuss importance of fidelity of implementation and progress monitoring when using visual supports.

Goal 1:	<i>Using a visual picture with “I need help” printed, Levi will independently ask for help when needed 4 times a day by getting out of his seat, finding someone (any teacher, assistant, peer), and giving them the “I need help” card for 3 out of 4 consecutive days.</i>			
Interventions	How to implement	Who will implement	When/Where	How will data be gathered? By Whom?
Visual supports Prompting Reinforcement Team considering – PECS as a useful process since Levi has experience with PECS and some success although inconsistent				
Resources Needed (technology, visuals, etc.:				
Professional Development Needed:	What form (coaching, training, modules, etc.):	Team to review prompting and reinforcement module with CSESA Coach; review fidelity checklists; Special Ed teacher to teach team about PECS and visual supports using module and fidelity checklists	For Whom:	All those implementing

Professional Development Needed:	What form (coaching, training, modules, etc.):	Team to review prompting and reinforcement module with CSESA Coach; review fidelity checklists; Special Ed teacher to teach team about PECS and visual supports using module and fidelity checklists	For Whom:	All those implementing

Implement Intervention

- * After receiving necessary professional development
- * Team member work with student on priority goal **30 minutes per week**
 - * In classrooms
 - * During advisory period
 - * During academic strategies/study skills
 - * During lunch/break
 - * At job site
 - * Anywhere!

Implement Intervention

- * Teach in smaller setting first if appropriate, then generalize to larger setting
- * Emphasize use of technology if appropriate

What can implementation look like?

- * The team decided to create small cards with the same picture to represent “help” that is used in Levi’s current schedule with the words “I need help”.

What can implementation look like?

I need the wipes.

I need a calculator.

What can implementation look like?

Levi walks over to teacher with visual cue
& says “I need help please”

PECS_AskingforHelp.mp4

Ongoing Monitoring

Fidelity of implementation

<http://autismpdc.fpg.unc.edu/content/briefs>

Helps teams know how the intervention is implemented and if it is being implemented the way the way it was designed (and how things may need to be modified or adjusted).

Module: Picture Exchange Communication System (PECS)

[illegible]

Ongoing Monitoring

Student performance

Helps us know if student is making progress, if intervention needs to be adjusted

3/18

Working on this,
3/18 & 3/19

Implementation Examples

- * Mike: sophomore, in general education for all classes
- * Mom, student, autism consultant, Gen Ed Eng II teacher completed SSSC
- * SSSC Goals: 05: Steps to complete assignment, completing assignments on time

Implementation Examples

Domain: **Independence Behavior**

CSEA Core Components

- ☐ Orientation to school (for student)
- ☐ Orientation to student (for staff)

Subdomain: **Organization**

SKILLS/BEHAVIORS

- ☐ Accesses and follows daily schedule
- ☐ Uses tools to keep track of assignments/work tasks and/or scheduling
- ☐ Brings appropriate materials to assigned location
- ☐ Materials/work space are organized
- ☐ Identifies steps required to complete assigned activities; completes assigned activities
- ☐ Moves to next destination or next activity on time
- ☐ Requests/initiates meetings with work groups, staff as appropriate

Implementation Examples

- * Met in Academic Strategies class to teach task analysis-
- * Used visual supports to teach concept, along with prompting, reinforcement

Let's Practice

- What are the steps to making a call on your phone?
 - Tell me the steps
 - I will write them down
 - I will try them out

8

Let's practice

- What are the steps to your vocabulary assignment in English each week?
 - Let's type them out
 - Check them off when done!
- How could you use this in class?

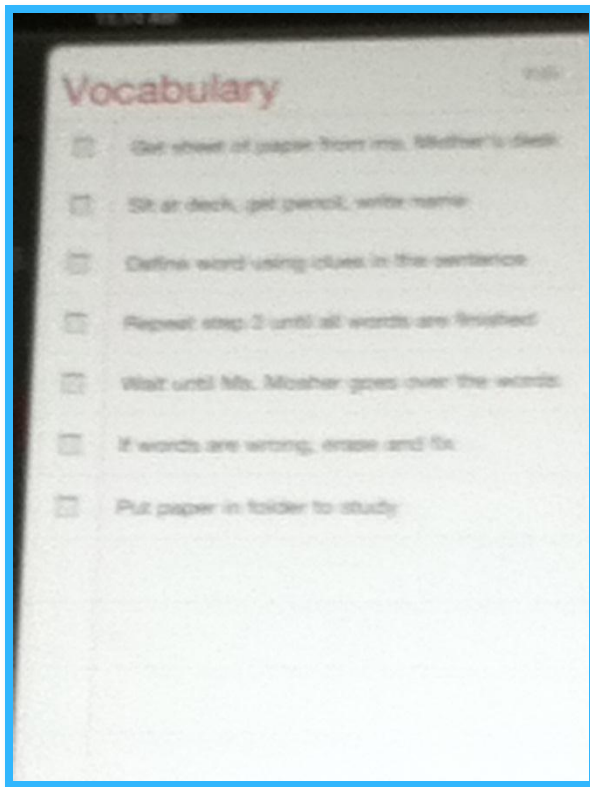

9

When there is an assignment...

1. Break it down into steps
2. Type steps into ipad
3. Complete steps by checking off
 - What if you don't know a step or need help?
4. Turn assignment in!

Implementation Examples

- * Went to Eng II class

The screenshot shows the 'ngrade' software interface. At the top, there are navigation tabs: My Classes, My Messages, My Account, Help/Contact, and Log Out. Below these are icons for Settings, Students, Gradebook, Calendar, Attendance, and Citizenship. A secondary row of buttons includes New Assignment, New Grading Period, Print Gradebook, Print Student Reports, and Export to Excel. The main section is titled 'Assignments 1 to 8 of 109 NEXT >>'. It contains a table with student performance data.

Student	ID	Grade	Per	Grammar Final	Oral Pres. #3	Timed Writing Practice #3	Reading test 3	Novel: Final Assessment	Paper #2, Final	DRJ27	DRJ 26
Julr Al-Kaa	0551	F	56%	54	95	ABS	48	60	0	0	
mis Al-Kaa	8099	F	46%	35	86	1.5	33	0	0	0	
ula Alarwa	5363	F	53%	85	92	2.5	79	0	0	0	
Jim Almehe	8724	S	70%	80	96	1.5	79	95	0	1	
Choi	7144	S	81%	77	93	2.5	83	E	94	0	
Inbar	7215	S	82%	74	75	3	85	E	89	1	

- * Saw improvement in:
 - * Writing his name & turning in assignments (they were steps in all task analyses)
 - * Asking for help when stuck (in task analysis)

Implementation Examples

SSSC Goal: SR1. Engages in self-calming and coping strategies when needed

0	Present level of performance	When stressed, student has difficulty identifying proper strategies, cries and refuses to participate.
1	Initial Objective	Given instruction in using a 5 point scale for stress/frustration, student will correctly indicate where he is on the scale and select appropriate behavior to reduce stress with unlimited adult support.
2	Secondary Objective	Given instruction in using a 5 point scale for stress/frustration, student will correctly indicate where he is on the scale and select appropriate behavior to reduce stress with no more than 5 teacher prompts.
3	Annual Goal	Given instruction in using a 5 point scale for stress/frustration, student will correctly indicate where he is on the scale and select appropriate behavior to reduce stress with no more than 2 teacher prompts.
4	Exceeds Annual Goal	Given instruction in using a 5 point scale for stress/frustration, student will correctly indicate where he is on the scale and select appropriate behavior to reduce stress independently.

Implementation Examples

SSSC Goal: **SR1. Engages in self-calming and coping strategies when needed**

EBPs Selected:

- Self-Management
- Visual Supports

- Intervention daily during academic strategies & math
- Special Education teacher facilitated

The image shows a spiral-bound notebook. On the top page, there is a self-management chart with five rows, each representing a level of emotional state from 1 (calm) to 5 (angry). Each row has three columns: 'How I look...', 'How I feel...', and 'I can try...'. The rows are color-coded: 5 (red), 4 (orange), 3 (yellow), 2 (green), and 1 (blue). A metal paperclip is attached to the right side of the chart. Below the chart, there is a contact form with fields for Name, Address, City, State, Zip Code, Home Phone, Cell Phone, E-mail, and Grade. The form is partially filled out with handwritten information.

	How I look...	How I feel...	I can try...
5	I am crying. I have my head down. I do not talk to anyone.	I feel angry.	I can control my behavior. I can talk to my parents. I can talk to a teacher.
4	I am raising my voice. I am saying rude things to others.	I feel upset.	I can be patient. I can take a walk to cool down.
3	I am pushing on my eyes. I am not focused.	I feel worried. I feel confused.	I can ask someone to repeat the directions.
2	I am staring 'into space.' I am not paying attention.	I feel sleepy. I feel bored.	I can stand up and stretch. I can remind myself to focus.
1	I am smiling. I am participating in class.	I feel calm. I feel good.	I can be kind to others. I can participate in class. I can talk with my friends.

Below the chart, there is a contact form with the following fields:

- Name: Michael Nern
- Address: 7623 14th
- City: Sun Prairie
- State: Wisconsin
- Zip Code: 53181
- Home Phone: 509-249-9
- Cell Phone: 509-249-9
- E-mail: m.nern@sunprairie.edu
- Grade: 14

At the bottom right, there is a label that says "Academ 2012".

Implementation Examples

0	Present level of performance	When stressed, student has difficulty identifying proper strategies, cries and refuses to participate.
1	Initial Objective	Given instruction in using a 5 point scale for stress/frustration, student will correctly indicate where he is on the scale and select appropriate behavior to reduce stress with unlimited adult support.
2	Secondary Objective	Given instruction in using a 5 point scale for stress/frustration, student will correctly indicate where he is on the scale and select appropriate behavior to reduce stress with no more than 5 teacher prompts.
3	Annual Goal	Given instruction in using a 5 point scale for stress/frustration, student will correctly indicate where he is on the scale and select appropriate behavior to reduce stress with no more than 2 teacher prompts.
4	Exceeds Annual Goal	Given instruction in using a 5 point scale for stress/frustration, student will correctly indicate where he is on the scale and select appropriate behavior to reduce stress independently.

Given instruction in using a 5 point scale for stress/frustration, student will correctly indicate where he is on the scale and select appropriate behavior to reduce stress with unlimited adult support.

Date	When/Where/What	Indicate correctly where he is on the scale (Y/N)	Tally prompts required	Select coping strategy (Y/N)	Tally prompts required
2/7	AM Algebra Answering homework problems	N		N	
2/7	PM Academic Strategies Writing down steps to project	Y		N	
2/8	PM Academic Strategies	N		N	
2/9	AM Algebra Working problems on the board	Y		Y	

Skill increased across the semester, and by the end of the year he could do both steps independently, score of 4.
